TE Application Tooling

Waldom Electronics, a master distributor, adds value to its supplier partners and distributor customers through precise execution for the following program and service:

TE Connectivity Application Tooling

TE Connectivity offers a complete line of hand tools to accommodate virtually all the needs of low or high volume manufacturing, prototyping, maintenance and repair. From manual tools to battery and electrically powered units designed for performance, TE's tools combine ease of use with reliability and precision. Waldom Electronics is a neutral master distributor stocking partner of over 1,000 tools for TE Connectivity offering a broad ready-to-ship inventory focusing on availability and low MOQ's.

Waldom Application Tooling Distributor Benefits:

- ▶ Waldom breaks packs and promotes a one (1) piece MOQ for most TE tools and is continually working on providing the best possible solution and service for our distribution customers.
- ▶ Waldom also offers a wide variety of design and solution kits (some with tooling). Please visit www.productkits.com to review our complete TE Connectivity kit offering.
- ▶ TE Tooling kits and availability can be checked online by visiting: www.waldomkits.com/TE-Connectivity/With-Tool/
